

MBA Entrepreneurship
Vilnius University Business School

**Rector of
Vilnius University**

Vilnius University Business School is proud to be the first institution in Northern Europe to offer an MBA in Entrepreneurship. MBA programs attract the best and the brightest from all around the world and we are happy to bring this integral educational experience to Lithuania. Vilnius University Business School was established to stand at the forefront of entrepreneurial education both locally and in the region. The new MBA in Entrepreneurship will help us further in fulfilling our mission to educate business professionals who contribute to our country's economic development.

Artūras Žukauskas, Professor
Rector of Vilnius University

We need to expand the definition of what an entrepreneur is and stop focussing only on young people who want to create world-changing businesses. Today, the entrepreneur is someone who can see an opportunity to create value for transforming the Employee society into an Entrepreneurial society. Shifting the orientation to an entrepreneurship program, to more innovation and challenge-driven models and adopting a curriculum grounded more on project-based learning, we are contributing to the creation and development of this Entrepreneurial society. What we need are entrepreneurs in every part of the organisation, people who are focused on identifying new opportunities, creating more and more value for themselves and society. And it doesn't really matter if this organisation is a business enterprise, a public organisation or an NGO. According to Klaus Schwab, we need to shape a future that works for all of us by putting people first and empowering them. This MBA in Entrepreneurship is a program helping to empower people.

Birutė Miškinienė, PhD

Vilnius University Business School Director

MBA Entrepreneurship at Vilnius University Business School is designed to take into account the most current global trends in entrepreneurial education. It is the result of years of consultation between Vilnius University Business School and leading institutions in the field of entrepreneurial education from Germany, the Netherlands, Israel and the USA. The program covers all the essential areas of venture creation: development, finance, marketing, communication, operations and leadership. Graduates of the MBA in Entrepreneurship at Vilnius University Business School will be well equipped to turn their ideas into action and create value for their clients, partners and society.

Entrepreneurship is the engine fuelling innovation, employment generation and economic growth. Only by creating an environment where entrepreneurship can prosper and where entrepreneurs can try new ideas and empower others can we ensure that many of the world's issues will not go unaddressed.
